# Tema III. Ubuntu Server & Odoo

Sistemes de Gestió Empresarial | 2023-2024 Andreu Sanz Sanz

## Tabla de continguts

Instalar Ubuntu Server	2
Instalar openssh-server	5
Hacer ping al servidor	
Conectar al servidor con WinSCP	
Instalar Odoo en el servidor	
Comprobamos la conexión desde el navegador	4

### Instalar Ubuntu Server

```
Daemons using outdated libraries

Which services should be restarted?

[**] packagekit.service
[*] unattended-upgrades.service

<a href="https://www.commons.org/libraries/">

Systemctl restart packagekit.service

<a href="https://www.commons.org/libraries/">

Service restarts being deferred:
<a href="https://www.commons.org/libraries/">

Systemctl restart unattended-upgrades.service

No containers need to be restarted.

No user sessions are running outdated binaries.

No VM guests are running outdated binaries on this host.
<a href="https://www.commons.org/libraries/">

No VM guests are running outdated hypervisor (qemu) binaries on this host.
<a href="https://www.commons.org/libraries/">

andreu@andreu-server: ** Is
<a href="https://www.commons.org/libraries/">
<
```

## Instalar openssh-server

```
Is: cannot access 'sudo': No such file or directory
Is: cannot access 'apt-get': No such file or directory
Is: cannot access 'install': No such file or directory
Is: cannot access 'install': No such file or directory
Is: cannot access 'install': No such file or directory
Is: cannot access 'openssh-server': No such file or directory
Is: cannot access 'install': No such file or directory
Is: cannot access 'openssh-server': No such file or directory
Is: cannot access 'install': No such file or directory
Is: cannot access 'install': No such file or directory
Is: cannot access 'install openssh-server

gpg: can't open 'ebo http://nightly.odoo.com/16.0/nightly/deb/./': No such
```

#### Para solucionar el error descargamos WinSCP

## Hacer ping al servidor

Hicimos ping al servidor para comprovar que teniamos conexión

```
C:\Users\2DAM_Sanz_Andreu>ping 10.0.2.15

Haciendo ping a 10.0.2.15 con 32 bytes de datos:
Respuesta desde 172.28.8.1: Host de destino inaccesible.

Estadísticas de ping para 10.0.2.15:

Paquetes: enviados = 4, recibidos = 4, perdidos = 0
(0% perdidos),
```

## Conectar al servidor con WinSCP

## Instalar Odoo en el servidor

### Ejecutamos el archivo odooinstall.sh y comprobamos su estado

## Comprobamos la conexión desde el navegador

## PostgresSQL activo

```
andreu@andreu-server:/etc$ systemctl status postgresql

• postgresql.service - PostgreSQL RDBMS

Loaded: loaded (/lib/systemd/system/postgresql.service; enabled; vendor preset: enabled)
Active: active (exited) since Wed 2023-10-11 14:16:13 UTC; 22min ago
Process: 763 ExecStart=/bin/true (code=exited, status=0/SUCCESS)
Main PID: 763 (code=exited, status=0/SUCCESS)
CPU: 843us

oct 11 14:16:13 andreu-server systemd[1]: Starting PostgreSQL RDBMS...
oct 11 14:16:13 andreu-server systemd[1]: Finished PostgreSQL RDBMS.
andreu@andreu-server:/etc$
```

Creación de productos en Odoo
